THE VISEGRAD PATENT INSTITUTE OFFERS
GLOBAL PATENT SEARCH SERVICES
TO A WORLDWIDE CLIENTELE REGARDLESS OF THEIR COUNTRY OF ORIGIN.

The Global Patent Search Services can help you to:

Gain proof of novelty of your technical solution/invention fast and understand the chances of success of patenting your invention.

Discover new research and development directions to turn your technical solution into protectable invention.

Complete due diligence before further investing in the R&D of a technical solution.

Grow the chances of a successful patent application with expert feedback.

Gain information about the relevant prior art in relation to a patent in-force before opposition/ post-grant review or litigation.

Build a stronger case for infringement claims, or protect investments before a transaction in respect of a given patent.

VPI Global Patent Search Services

Novelty Search Service (NSS) and
Novelty Search with Preliminary Patentability Report (NSPPR)

The goal of the NSS and NSPPR is to provide information on prior art relevant for the given invention/technical solution that can help assess novelty and inventive step of an invention or technical solution. The service results in a report that includes a brief summary of the cited documents (NSS) and, in case of NSPPR, a detailed explanatory opinion on whether the invention meets the requirements of patentability in terms of novelty, inventive step and industrial applicability.

Validity Search Service (VSS)

VSS offers in-depth searches of a patent specified by the customer that is in force (or has family members in force) in at least one country, with claims available in English. VSS identifies patent documents and other publications that can affect the validity of the patent in question. In addition, a detailed explanatory opinion is provided on whether the invention contained in the given patent meets the requirements of patentability in view of the cited prior art documents.

All services are performed in databases of patent and non-patent literature covering the PCT Minimum Documentation and fully in line with the practice of European PCT Authorities.

VISEGRAD PATENT INSTITUTE

GLOBAL PATENT SEARCH SERVICES

Benefits of the Global Patent Search Services of the VPI

- Fast: Get answers, receive report electronically in 4 weeks.
- Reliable: Highly skilled and experienced patent examiners carry out the search.
- Comprehensive: Search is carried out in all necessary databases worldwide.
- Convenient: No formal requirements for presenting the invention; direct contact to the office.
- Cost-effective: One flat fee for NSS and NSPPR. For VSS, the fee is specified in a quote before the service begins with no hidden extra costs based on the volume of searches.
- Practical: Make further use of the English language reports in business or IP protection.

Why chose the Visegrad Patent Institute?

The VPI was appointed as an International Searching Authority (ISA) and International Preliminary Examining Authority (IPEA) under the Patent Cooperation Treaty (PCT) in 2016. The services of the VPI are provided by experienced and skilled examiners of the four National IP Offices of the V4 Contracting States. The VPI applies the standards of the European Patent Office in respect of the databases used for search, the training of the examiners, and the practices of search and examination. The VPI is also certified according to ISO 9001:2015 standard.
